

Dirichletovy okrajové podmínky, $h = 0.25$

$$-0.4y'' + 2y' = 10 \quad \text{pro } x \in (0, 1)$$

$$y(0) = 5$$

$$y(1) = 20$$

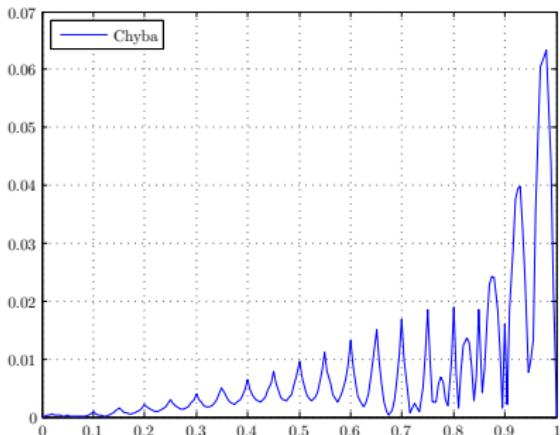

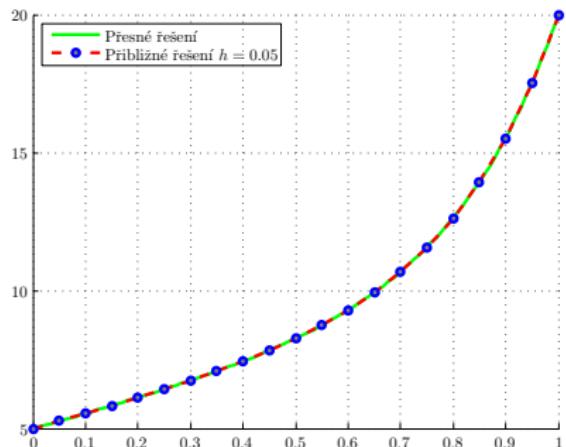

Dirichletovy okrajové podmínky, $h = 0.05$

$$-0.4y'' + 2y' = 10 \quad \text{pro } x \in (0, 1)$$

$$y(0) = 5$$

$$y(1) = 20$$

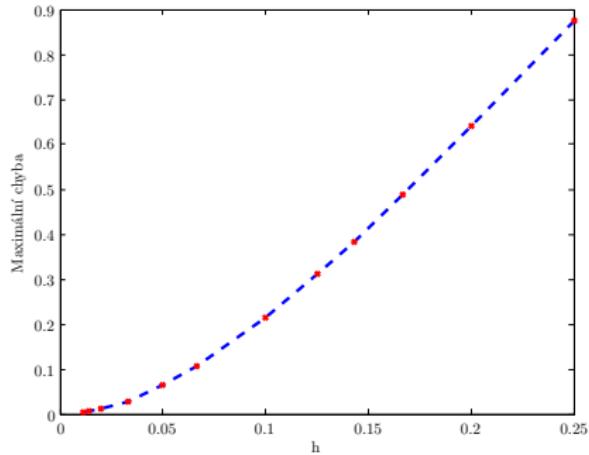

Dirichletovy okrajové podmínky

$$-0.4y'' + 2y' = 10 \quad \text{pro } x \in (0, 1)$$

$$y(0) = 5$$

$$y(1) = 20$$

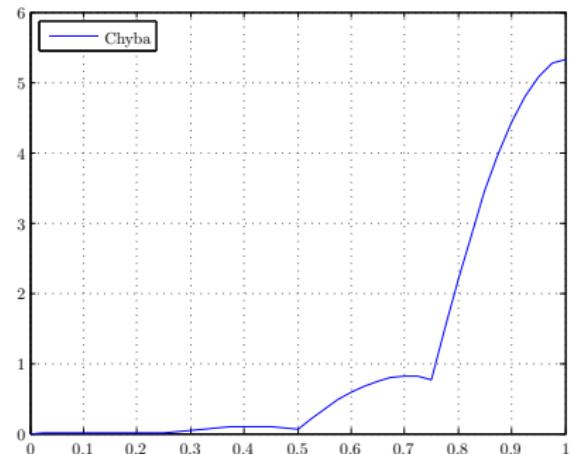

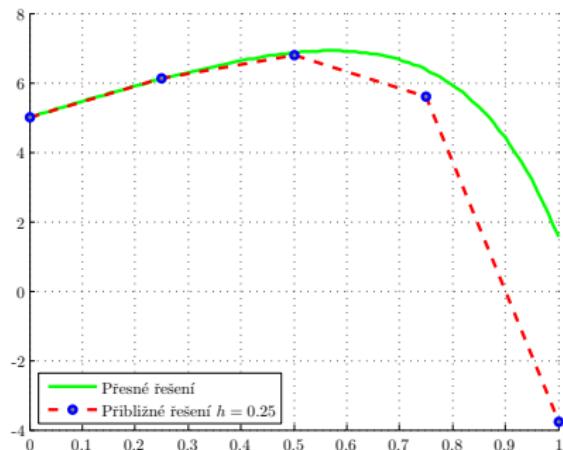

h	0.2	0.1	0.05	0.02	0.01
maximální chyba	0.6407	0.2154	0.0634	0.0116	0.0016

Dirichletova + Neumannova podmínka, $h = 0.25$

Neumannova podmínka je aproximována s použitím první zpětné diference.

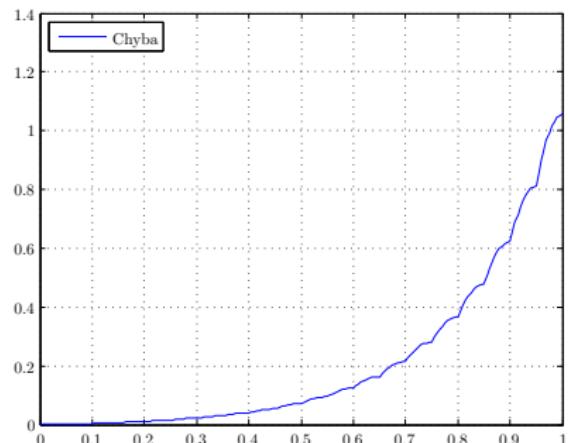

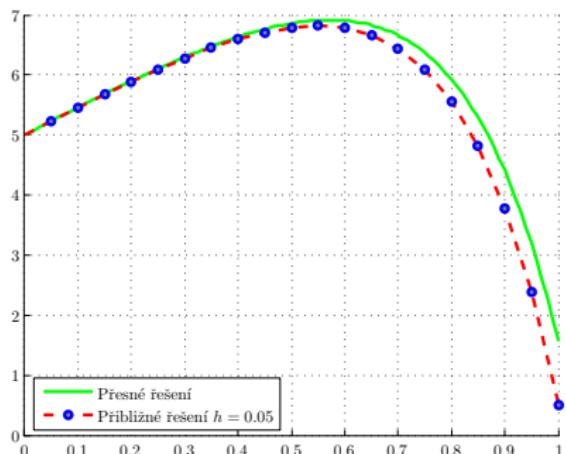

$$\begin{aligned}-0.4y'' + 2y' &= 10 \quad \text{pro } x \in (0, 1) \\ y(0) &= 5 \\ -0.4y'(1) &= 15\end{aligned}$$

Dirichletova + Neumannova podmínka, $h = 0.05$

Neumannova podmínka je approximována s použitím první zpětné diference.

$$\begin{aligned}-0.4y'' + 2y' &= 10 \quad \text{pro } x \in (0, 1) \\ y(0) &= 5 \\ -0.4y'(1) &= 15\end{aligned}$$

Dirichletova + Neumannova podmínka

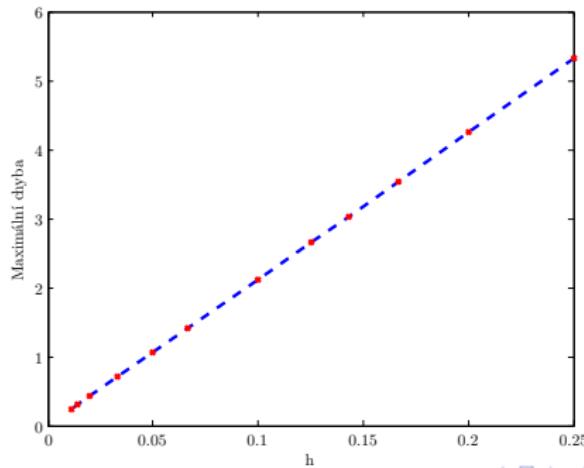

Neumannova podmínka je approximována s použitím první zpětné diference.

$$-0.4y'' + 2y' = 10 \quad \text{pro } x \in (0, 1)$$

$$y(0) = 5$$

$$-0.4y'(1) = 15$$
